

SCIENTIFIC SEMINARS

April 3rd

Mariano Rico (ETSII, UPM)

Big data visualization in the semantic web

April 10th

Jaime Huerta-Cepas (CBGP, UPM)

Functional metagenomics: the role and extent of microbial dark matter

April 24th

Luís Rubio (CBGP, UPM)

Combining synthetic biology and hard core biochemistry to assemble nitrogenase in yeast

May 8th

Pablo Mínguez (F. Jiménez-Díaz)

Introducing Bioinformatics in the clinical setting

May 14th

Nuria Montes (H. La Princesa)

Using Bioinformatics to develop a diagnosis kit for early rheumatoid arthritis

May 22th

Krzysztof Wabnik (CBGP, UPM)

Multilevel computer models of plant developmental patterning

May 27th

Matteo Cavaliere (University of Edinburgh)

Cooperation and competition in microbial communities

May 28th

Matteo Cavaliere (University of Edinburgh)

Applications of evolutionary game theory to structured populations
